## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 28, 30-34, 36 and 37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Spendlove (US Patent 4,004,322).

Spendlove teaches a method for extracting blood from an animal fetus. However, Spendlove does not discuss the steps of securing a placenta against a substantially planar first face, and massaging the placenta against the first face. These method steps read on a person pressing the placenta in ones hands while at the same time massaging the placenta to assist gravity in increasing blood flow. And as such, in regards to claims 28 and 33, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the method steps of Spendlove with the step of massaging the placenta against a first planar face, in order to increase blood flow and collection.

In regards to claim 30, as the placenta rests against your hand, it will spread as the result of force placed on it.

Regarding claim 31, Spendlove teaches resting the animal fetus on a first table top vertically disposed below the first face. See Figure 1.

***Allowable Subject Matter***

Claims 29 and 35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
